PROFILE

I am React.js Front-End Developer eager to contribute my skills and grow in the world of web development. With a solid foundation in HTML, CSS, and JavaScript, I specialize in building user-friendly web interfaces. I have experience collaborating with cross-functional teams and a strong desire to stay updated with the latest industry trends and best practices in front-end development.

WORK EXPERIENCE

React js Developer

Focus Research Lab pvt

2023 march - Present

- Actively participated in bug fixing and debugging processes, enhancing the overall application quality.
- Addressed UI issues to improve the user experience and user interface design.
- Successfully implemented small features and functionalities to enhance application performance.
- Managed API connectivity, verifying data integrity and communication with MongoDB.
- Developed and maintained Redux-related functionality for efficient state management.
- Utilized Postman for API response validation and testing.
- Conducted end-to-end (E2E) testing to ensure the reliability and functionality of web applications.

PROJECT

Signup Login

Focus Research Lab

2023

- Developed a user-friendly Signup and Login web application using React and Redux.
- Implemented a robust user validation system to enhance security and user experience.
- Utilized form handling techniques for efficient data collection and submission.
- Leveraged Axios to fetch data from external APIs and displayed it in the user dashboard.
- Employed CSS for clean and simple styling, ensuring a visually appealing interface.
- Gained practical experience in React, Redux, API integration, user validation, and CSS styling, while successfully completing the project.
