WORK EXPERIENCE

React js Devloper

2023 march - Oct   https://www.focusresearchlabs.com/   chennai

- Actively engaged in the bug fixing and debugging processes, contributing to the overall enhancement of front-end UI quality.
- Dedicated efforts to address UI issues, resulting in significant improvements to both user experience and user interface design.
- Implemented small features and functionalities, enhancing application performance.
- Managed API connectivity, ensuring data integrity and facilitating communication with MongoDB.
- Developed and maintained Redux-related functionality for efficient state management.

Web Devloper Intern

2022 April -2022 Sep   https://gigaai.in/   kolkata

- Acquired foundational knowledge in web development, covering HTML, CSS, and JavaScript.
- Contributed to small-scale web development projects, gaining practical hands-on experience.
- Collaborated within a team to actively contribute to project development and improvement.
- Assisted in designing and coding web elements to enhance user experiences.
- Demonstrated a commitment to continuous learning and professional growth as a web developer during the internship period .

PROJECT

Signup Login   https://sign-up-in-auth.netlify.app/

- Developed a user-friendly Signup and Login web application using React and Redux.
- Implemented a robust user validation system to enhance security and improve the user experience.
- Utilized effective form handling techniques for efficient data collection and submission.
- Leveraged Axios to fetch data from external APIs and seamlessly displayed it in the user dashboard.
- Gained practical experience in React, Redux, API integration, user validation, and CSS styling while successfully completing the project.

User Management System

- Utilized Node.js and Express.js for server-side development.
- Employed React.js for client-side development, creating an intuitive and responsive user interface. Developed RESTful APIs to handle CRUD operations, ensuring seamless data manipulation. Integrated frontend and backend systems for smooth communication and data flow.
- Leveraged various libraries and tools, such as Axios for API requests and toastify for popup notifications, based on project requirements.
- Implemented robust error handling and validation mechanisms on both the server and client sides to ensure a secure application.
